Summary

I'm an **Android** developer since 2009, I'm fluent in **Java**, have some notions in **Ruby, Rails** and have a pretty good eye for **UI/UX**.

Attending **conferences** and Droidcons (UK/FR and counting...) has been a terrific experience, that's why I've joined the Paris Android User Group team where I'm helping organizing meetups and sometimes even **speaking**.

Experimenting and trying new stuff around is probably what I like to do most, recently **RxJava** and **Material Design** occupied a good part of my free time.

All my work is available on **Github** and on the **Playstore**, I'm a strong believer in **open source** and I can spend hours reading other people code and tweaking animations so it looks perfect.

I'm open to any opportunity anywhere in the world (doesn't necessarily have to be linked to Android as I love to learn new things) .

Work

2011 - 2014 Android developer at Alkeo (apprenticeship program)

2010 - 2014 Camp counselor at Telligo

Education

2011 - 2014 Engineering IT Student at Polytech Paris Sud, France
